PROFESSIONAL SUMMARY

Software Engineer focused on building modern, responsive web applications and polished digital experiences. Strong interest in frontend development, programming fundamentals, UI/UX, APIs, Git/GitHub and turning ideas into working products. Currently pursuing a B.Tech in Computer Science/Engineering and strengthening software engineering skills through hands-on projects.

TECHNICAL SKILLS

Frontend: HTML5, CSS3, JavaScript, React, Responsive UI, Accessibility

Programming: C, C++, JavaScript, Object-Oriented Programming, Data Structures, Algorithms

Tools: Git, GitHub, VS Code, Figma, API testing, Deployment workflows

Engineering: REST APIs, UI/UX implementation, debugging, responsive design, software development fundamentals

DEVELOPMENT & SERVICES

- **Website Development** — Responsive and modern web applications
- **Mobile App Development** — User-friendly Android/mobile applications
- **Game Design & Development** — Interactive game concepts and development
- **AI Automation Tools** — AI-powered tools and workflow automation
- **Bug Fixing & Debugging** — Troubleshooting, optimization and issue resolution
- **UI/UX Design** — Clean, intuitive and user-focused interfaces

PROJECTS

EatSure India | *Web App / Full Stack*

Built a modern food discovery and ordering platform concept with restaurant discovery, responsive interfaces and scalable product architecture.

Technologies: React • JavaScript • API • UI/UX

Azviron Technologies | *Technology Website*

Developed a professional technology-company website focused on brand presentation, service communication, responsive layouts and interactive user experience.

Technologies: HTML • CSS • JavaScript • Responsive Design

EDUCATION

B.Tech Degree — Gramin Technical and Management Campus, Nanded — Joined 2026; currently in 2nd year.

Diploma in Computer Science — Jijau Institute of Engineering Technology and Management — Passed 2026 with 76.88%.

10th / SSC — Mukundraj Higher Secondary School, Nandgaon, Latur — Passed 2023 with 74.68%.

EXPERIENCE / ENGINEERING JOURNEY

Software Engineering & Projects — Building web applications, strengthening development fundamentals and converting project ideas into working products.

Computer Science Foundations — Practicing programming, data structures, algorithms, databases and core software-development concepts.

Continuous Learning — Exploring modern development tools, experimenting with new ideas and improving engineering and design skills.

CERTIFICATIONS & ACHIEVEMENTS

Add relevant certifications, hackathons, internships, awards or workshops here.
